## DETAILED ACTION

### *Election/Restrictions*

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
  - I. Claims 1-11, drawn to a bunion correction apparatus, classified in class 607, subclass 72.
  - II. Claims 12-22, drawn to a method of correcting an imbalance between two muscles, classified in class 607 subclass 2.

The inventions are distinct, each from the other because of the following reasons:

2. Inventions I and II are related as process and apparatus for its practice. The inventions are distinct if it can be shown that either: (1) the process as claimed can be practiced by another materially different apparatus or by hand, or (2) the apparatus as claimed can be used to practice another and materially different process. (MPEP § 806.05(e)). In this case, the bunion correction apparatus of invention I can be used to reduce muscle pain and to prevent deep vein thrombosis.
3. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.
4. A telephone call was made to Mr. William Squire on 07/26/02 to request an oral election to the above restriction requirement, but did not result in an election being made.

Art Unit: 3742

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
